Kasanga Market Dues Revenue Leakage Detector

1. Introduction

Local government market dues are often lost because of missing records, unpaid balances, duplicate payments, and unregistered traders. This project helps track trader dues and detect leakage.

2. Problem Statement

Market officers need a simple way to record dues, track payments, and identify missing revenue.

3. Objectives

Track dues, detect unpaid balances, compare expected revenue with collected revenue, and improve accountability in Kasanga Market.

4. Business Value

The system reduces revenue loss and creates a strong basis for local government financial control.
